### Keeps automatic watches up to date

An appliance for collectors and lovers of high-quality automatic watches.

Of special interest for watches with moon phase display and eternal calendar.

By means of Cyclo-Matic-Due, valuable watches can be stored even for extended periods of time and the watches will not stall.

Battery powering and mains power supply.

Operating mode:

Every thirty minutes, the appliance switches on automatically for approx. two minutes, alternating between counter-clockwise rotation and clockwise rotation.

Watches with alternating rotor are optimally wound in both directions.

With mains power supply, continuous operation is also possible.

The appliance can be used for two wrist watches.

Included in delivery:

Four batteries 1,5 V
